

Maryland Overdose Response Program (ORP) Authorized Training Entities

The Department of Health and Mental Hygiene (DHMH) launched Maryland’s Overdose Response Program (ORP) in March 2014 to train and certify community members most able to assist someone at risk of dying from an opioid overdose when emergency medical services are not immediately available. Successfully trained individuals receive a certificate allowing them to obtain and have filled a prescription for naloxone a life-saving medication that can quickly restore the breathing of a person who has overdosed on heroin or prescription opioid pain medication like oxycodone, hydrocodone, morphine, fentanyl or methadone.

DHMH authorizes private or public entities to conduct educational training programs using a core curriculum that includes information about prescription and non-pharmaceutical opioids and training on how to recognize and respond to an opioid overdose, proper rescue breathing technique, and how to properly administer naloxone and care for the individual until emergency medical help arrives. The training also stresses the importance of calling 911 for the person in distress and reporting the naloxone administration event to the Maryland Poison Center.

This directory contains contact information for authorized training entities throughout Maryland. **Click on the links below for further details.**
